

SKELETONS

BONES!

We have 206 bones in our body. If we didn't have any bones we would be mushy! We would also not be able to move like we do everyday.

These are what we call some of our bones.

Can you remember some of them and write them down for someone to check?
Write the common name then the scientific name.

Common Name	Scientific Name
skull	cranium
jawbone	mandible
collarbone	clavicle
shoulder blade	scapula
breast bone	sternum
funny bone	humerus
spine	vertebrae
hips	pelvis
wrist	carpals
thigh bone	femur
kneecap	patella
shin bone	tibia
ankle	tarsals

HOW ARE OUR BONES WHITE?

Our bones are white because all the calcium we have makes our bones white! Mostly milk makes our bones White and strong!!!!

WHAT ARE BONES MADE OF?

Almost every bone in your body is made of the same material.

The outer surface is called the **Periosteum**.

The next layer is called the **compact bone**.

Within the compact bone there are many layers of **cancellous**.

In many bones , the cancellous bone protects the innermost part of the bone, the **bone marrow**.

Bones are strong if you look after them!!!

WHAT'S THE SCIENTIFIC NAME?

CRANIUM / SKULL

This is under the skin of our head.

MANDIBLE / JAW

This helps us to chew and holds our teeth in place.

WHAT IS THE COMMON NAME?

RIB CAGE / THORACIC CAGE

KNEE JOINT / PATELLA

*THANK YOU FOR LISTENING TO MY PRESENTATION
I HOPE YOU HAVE ENJOYED MY PRESENTATION.*

THANK YOU!
