

Being Safe Online... ...my digital footprint

Monday 29th January 2024

What is my digital footprint?

- What online platforms do I access?
 - Who with?
 - Why?
 - Who lets me?
- Do adults at home know?

YouTube

- Who is old enough?
- What do I use it for?

Think & ask yourself
before you post...

- Would I do this on a stage in front of a real life audience?
- Who will see it?
- Who will share it?
- What would my mum/dad/family/friends/adults at school say or think?
- Why am I posting it?
- Am I old enough?
- Am I responsible enough?

Think before you post

- What (am I posting)?
- Who (will see what I am posting)?
- Who (could share my post)?
- Where (is my post going to go?)
- Why (am I posting)?

Did you know...

- The age restriction for You Tube is **18**
- You can use a trusted adult account if you are **13+**
- **If you are under 13 you are breaking the law**
- If you are under 18 and post content that is not appropriate, suitable or seen as ok, the trusted adult whose account you have used **is at fault and it is them who can be charged if the law has been broken as well as you if you are over 10**

Don't try to
grow up too
soon!
