

A Step-by-Step Guide to Solving Audio Issues on PowerPoint

As you will have noticed I like to include audio on most slides so children can listen to the slides independently. They look like this:

Please follow the steps below if you are having problems and hopefully this will solve it. The audio problem is due to some devices having an older version of PowerPoint than I have. By downloading this it should play everyone's PowerPoint audio and videos without any problems.

If you are using a Windows computer/laptop and are having issues playing audio (Mac computers already have this installed) please download this **free** software called **Apple QuickTime**. https://support.apple.com/kb/DL837?locale=en_GB

STEP 1: Type 'Quicktime download' into the Google search bar, click the first link from support.apple.com

Important: QuickTime 7 for Windows is no longer supported by Apple. New versions of Windows since 2009 have included support for the key media formats, such as H.264 and AAC, that QuickTime 7 enabled. All current Windows web browsers support video without the need for browser plug-ins. If you no longer need QuickTime 7 on your PC, [follow the instructions for uninstalling QuickTime 7 for Windows](#).

What's New in QuickTime 7.7.9

QuickTime 7.7.9 contains security updates and is recommended for all QuickTime 7 users on Windows. For information on the security content of this update, please visit this website: <http://support.apple.com/kb/HT201222>.

The QuickTime web browser plug-in is no longer installed by default and is removed if you have a previous version of QuickTime on your PC. If you still need this legacy plug-in, you can add it back using the custom setup option in the installer.

QuickTime 7 is for use with Windows Vista or Windows 7. If installed on other versions of Windows, it may not offer full functionality.

For more information, see [QuickTime 6 Pro users](#).

STEP 5: Follow the on screen instructions to complete the installation.
